

Catarrh of Stomach Did Not Know It

Mrs. Selena Tanner, Athens, Ohio, writes: "I cannot find words to express my thanks for your kind advice. I never once thought I had catarrh of the stomach. I commenced taking Peruna, as you directed. My stomach continued to hurt me for about two weeks after I began the medicine, and then it stopped. I now have a good appetite, while before I was nearly starved."

To Remove Oil Stains.

It has been found that oil stains on concrete floors may be removed by using a mixture of one pound of oxalic acid in three gallons of water, with enough wheat flour added to make a paste that can be applied with a brush. Allow the application to remain for two days, and then remove it with clean water and a scrubbing brush. A second application may be necessary in stubborn cases.

BIBLE—John F. Bible writes to a friend here that he has been promoted to manager of the department of finished cars with the automobile house at Lansing that he went with last summer. He says his company did a \$50,000,000 business last year and John's friends would like to see him get a good share of the profits.

COOPER—Another trace of snow fell Thursday night, bringing the total fall up to about 15 inches since the 11 at big January snow. Some of his has softened and then turned into ice and there is now a two-inch crust covered by about two inches of new snow. R. E. Cooper, who is good on "figgers" has been calculating the weight of snow now on the roofs of the city. Estimating the weight at 10 very square of roofing is sustaining a weight of half a ton. A large building with a flat roof is weighted down in some instances by 50 to 100 tons of snow. As the ground is frozen under the snow on the earth, it will be slow to melt and the snow on the houses when it does melt will remain on the ground a long time as "alop."

Catarrhal Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless this inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system.
We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, etc.

"The Wicked Walk"

"The wicked walk on every side." Ps 12: 8.

It was David who made the observation above, but while the wicked can walk on ice-covered sidewalks the good people cannot always fare so well.

For instance:
Judge G. H. Champlin's whole cosporosity, which is saying a good deal, came down in a undignified heap the other day.

Otho Anderson took quite a tumble himself one of these nice cool mornings and came pretty nigh saying something.

E. C. Thomas, the telephone man, while walking along with his hands in his own pockets did the McGinty act and scattered nickels and dimes, all over the beautiful white landscape.

M. C. Forbes—the real article not the grandson of the same name—failed to prove his wickedness in front of the Pennyroyal. He swallowed his choler.

Even the ladies sometimes do just like the men. A prominent doctor's wife the other day came down with such force that she was reminded of the need of an accident policy.

Usually when they fall they get up and look around to see if anybody saw them. This is especially true of the ladies.

Italians Score Again.

The enemy received another bloody repulse near Venice Friday. Here his attack was thrown back after four hours of desperate fighting. The enemy suffered heavy losses, the ground being strewn with his dead. The Italians captured 150 prisoners and a large quantity of guns and war material.
